

**Breisch & Crowley / BCdesignbuild's project  
AWARDED as Reader's Choice BEST MAN CAVE  
in the annual magazine issue of the  
2021 The Best Log & Timber Homes of the Year**

Here are some excerpts: *"Not every timber frame building is a home. New this year, our reader-voters had the chance to take a peek at some of the coolest outbuildings around. This space is totally designed to kick back and party! Framed with rough-sawn cypress with a scissor truss bent and a structural insulated panel room system, the 16-foot-deep overhang is the gateway to a 1,296-square-foot man cave to end all man caves, boasting everything from a pro-grade U-shaped bar, multiple flat screens, an arcade and even a golf simulator."*

**Voted Best Accessory Building:**

This fantastic man cave was constructed by JD&E, Inc. with trusses and timbers + SIPS by Heavy Timber Truss & Frame from the design created by Breisch & Crowley / BCdesignbuild.com

The owner of the residential golf simulator facility, P.J. Latsko had the following say about the teamwork of JD&E and BCdesignbuild: "We couldn't be more pleased with the design and the construction of all of the projects we have done and continue to do with BCdesignbuild and JD&E. This team repeatedly impresses us with their professionalism and can do attitude. Their entire team works together very well and has completed numerous projects for us over the past several years. They always come through with exceptional results."
